

Let us show our Africa,
our Uganda

Why see the **BIG 5** when you can see **big7**

Lion, African elephant, Cape buffalo,
Leopard, Rhinoceros, Chimpanzee
and Gorilla

Our unique position on the continent means we have both savannah species typical of East Africa (lion, elephant, buffalo, giraffe, zebra, warthog etc.), and forest species more typical of Central Africa (forest elephant, red river hog, chimpanzee, mountain gorilla, forest buffalo).

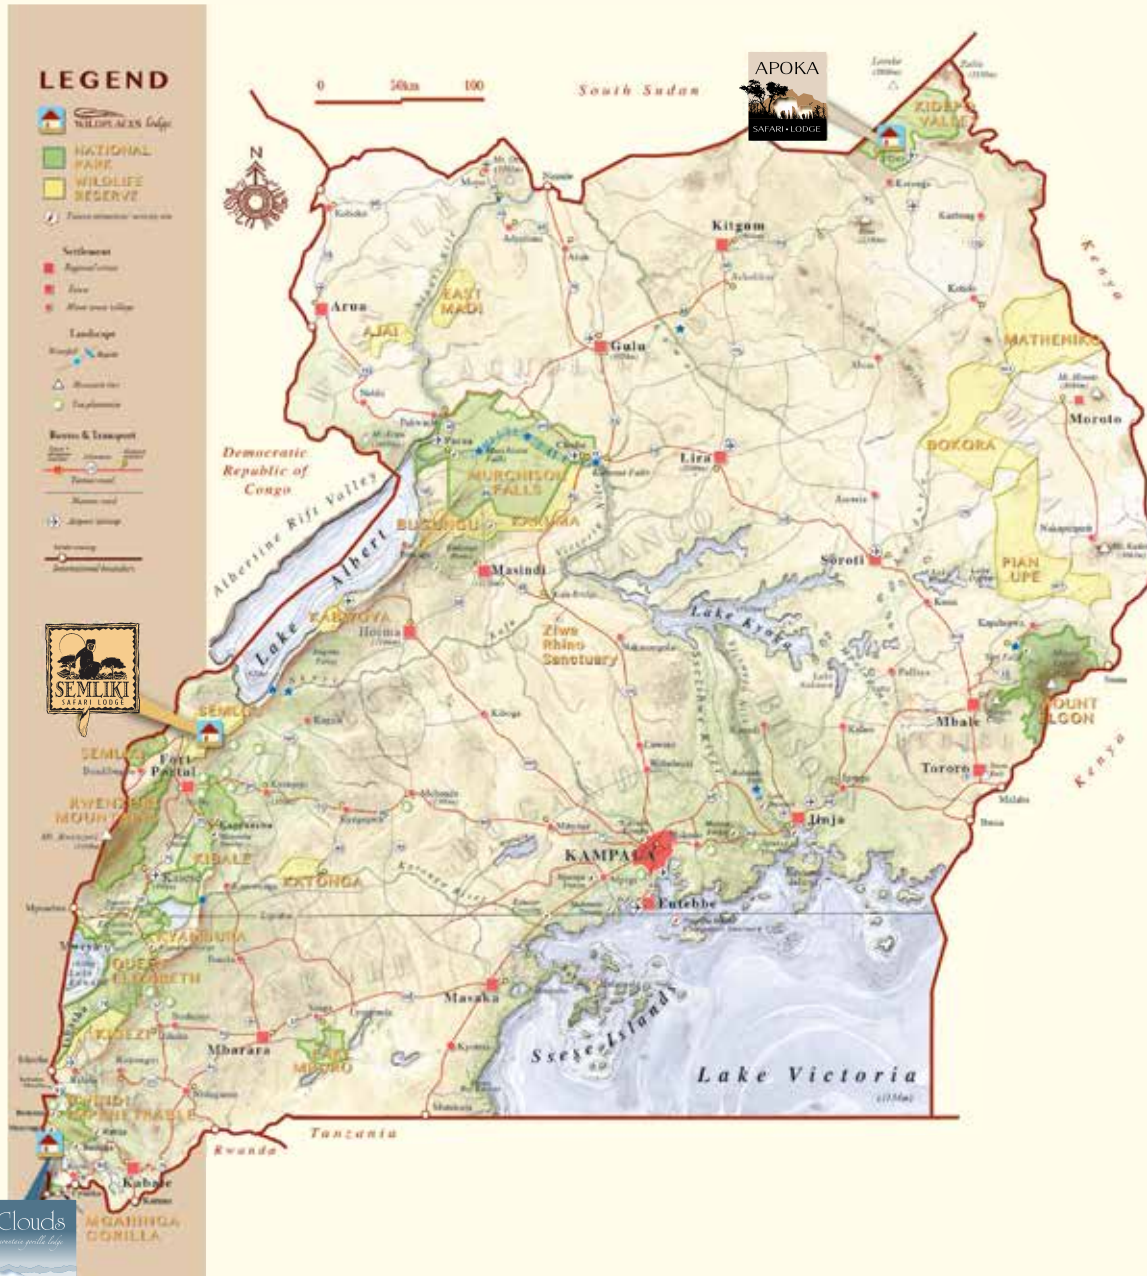

More about **Uganda**

-  Right at the heart of Africa, where the East African savannah meets the Central African rainforest
-  Largest fresh water lake in Africa which is roughly the size of Ireland
-  Uganda is approx. 241,038 km², around the same size as Germany
-  Home to 54 % of all the mountain gorillas in the world
-  With more than 56 tribes, Uganda is a cultural melting pot

More about **Uganda**

-  One of the safest countries in Africa
-  Over 1060 bird species, which is more than in USA and Canada combined
-  The Nile, the longest river in the world starts from Uganda on its way to Alexandria, in Egypt, where it ends in the Mediterranean
-  With 28 lakes and many more rivers, water covers 15 % of Uganda

A safari in Uganda is like visiting 'Africa in miniature'
it's all here.

Tangled jungle, glacier-capped mountains, roaring rapids, vast sparkling lakes, terraced hillsides, grassy plains, arid savanna, deep forest...and breathtaking beauty everywhere you look.

Aristotle said **“The whole is greater than the sum of its parts”**, and nowhere is this truer than in Uganda.

Kidepo Valley National Park

Northern Uganda

Uganda's most remote and untouched park. The local communities around the park includes the Nilotic Karamajong and the Ik

What to do?

-  Night game drives
-  Lorukul Village Visit
-  Visit to one of Africa's most remote tribes: the IK Tribe
